about the controversy between Weed and Greeley, not that the Times feels any concern about any principle, but on the eye of an election it is imprudent in partisans Raymond need not be uneasy; his party is made of other stuff than that affected by any difference of principle. According to Cox, of Ohio, they must hold power; for if they do not, these rascally Demoerats may get the ascendancy and undo all they have done. They must keep power to protect themselves from legal penalties for their multiplied sins. They must keep power to protect the holders of Mr. Schude has ubandoned the case.

Mr. Schude has ubandoned the case.

Mr. Schude—I have tried to stay here as the national debt. As to any principles, they can differ as widely as they please. Their differences are those of hones brothren, who should bear with each other, and not aid to give power to wicked Democrats, who would play the very Devil with all the nice little arrangements about pelf and power, that ought to run down in a prolific stream of good things to the faithful in all times. The Times ought to take up Montgomery Biair and rebuke him. He is behaving himself very unseemly. He charges Seward, Stanton and Holt with being the promoters of the rebellion-with being much more guilty than the men of the South generally were. He denounces all these harsh measures of the Radicals, and necuses them of a design to establish a monarchy or un arbitrary government-strip ping States of their just rights. If Blair had not negro on the brain, he would be worse than any Democrat we know of. His attacks are viperous. But, after all, Blair will support the party that keeps Stanton, Holt and Seward in office; just as Thurlow Weed did, and does now. Weed feels slandered when accused of working against his party nomination, nuch us he declared himself opposed to their ereed, and little as he thought of their discretion and statesmanship. So Blair, after all hisphilippies against Stanton, Seward, Holt & Co., will, nevertheless, support the party that keeps such nen in power, and he will feel slandered if charged with not doing his best for the now under the charge that he defeated

Wadsworth and elected Seymour. No man who understands the tactics of this dominant party will regard the ralltolerated, nay encouraged to find fault and ienounce; so that they may lead off theso measy people who feel sour over the outand there in their own party, who agrees with them and expresses their feelings. When the crisis of party comes, those or acles will be ready to advise their bands of great use to the party, and enable it to but, like the King of France

How versatile is genlus! Who could have expected from the author of such a convulsive article the weighty philosophy of last Saturday morning? We didn't read it all; not we. We would prefer to carry a small glacier of the Alps to reading such a production. Indeed, we must hold the pubthe article at the street corners to the lamp-posts.' . #### The Last Hours of Gov. Brough-The Closing Scene,

The Cleveland Leader, of Wednesday, has the following: The closing scene in the life of Governor Brough, as described to us by an eye-witness, are full of interest and pathos. (In Mouday evening, at about nine o'clock,

he Governor awakened from the insensi bility in which he had lain for some days and at the request of his family, who gathered around his bed-side, Surgeon General Barr informed him that all which human skill could do for him had been attempted, and in vain, and that now he was in the hands of Almighty God. He could not live forty-eight hours. The Governor was greatly shocked at this an-normeement, and looking General Barr in

State Agricultural Fairs--- When and Where they are to be

The season of Fairs is now at hand, and as these are now atmost the regularly established institutions of our country, exerting an important influence on the farming and mechanical interests thereof, and as at this time the battle-field and the camp have ceased to be cisimunts for general attention, it is proper that this should be given to our agricultural fairs, as it would be but commensurate with their importance to all classes of people. They are really renulons of the representatives of ull the industries, where our people study each other's wages, and how these may be best supplied, each profited by may be best supplied, each profited by be process, instructed by the "binpari-on, and excited to energetic action by competition. Thus they become not only llustrations of our industrial and mate-ial condition, but are stimulants to farmfree constitution, but are stimulants to farm-free, stock-ralsers, and nechnics, result-ing in the mutual benefit of all. These meetings of industrious, thinking people have a relation to the bushess of the country that must not be overlooked, for they certainly tend to form, in some de-gree, the future physical character of the nation, and contribute not a little, now, to its material prosperity.

The interest in the fairs should not be oral in its character. As we have a pride no our own, county or State, so should our needs to cater ou the industrial exhibitions in our own foodities; but as we have a patient which are a should this great by a national price, so should this same in-terest extend to the Agricultural Fairs of other Stries. Let this feeling become gen-eral; is these fairs everywhere be strip-ped of sameness, and shorn of dullness, and they will revitalize the country. Be-low we give facts relating to the State Fairs that will be found of special interest. OH10.

Be Seiler's Liver Pills cure Ague and Fever. The liver is more or less out of order lu all attacks o Ague and Fever; so much so, that the Ague is no always curable, unless the liver is first right. Al-tempts to check ague by quinine, when the liver is diseased, frequently bring on general dropsy. If the Liver Pills are used be ore taking quinine, and can-tiously continued after it, so as to keep the bowels open according to the general directions, not only will return of chill be less frequent, but the cur will be more perfect. The Liver Pills are partic larly use'ul in all aguish sections of the country. In all such regions, the liver is so often in a, had states as to be concerned in producing a large portion of their maindles. Let the resident population give it a fair trial; keep the bowels open with the pill; take in each case, twenty grains of quinine, between the chilis to check them, and fifteen grains every eigh r ten days afterwards, for several weeks, and they will seldom need a physician for ngue and fever These pills are now used in many sections of the country, for ague and fever, and with great success without the aid of online. without the aid or online.
